Date :2009-12-01 version 2. This book is the self in the editor. Experimental Physics Lecture based on the requirements for institutions of higher education and student characteristics and write of. The book is divided into eight chapters. the first chapter of measurement error and data processing. the system description of the error theories. concepts. methods and data processing concepts and uncertainty estimation method. is the theory of physics experiments in class; second chapter commonly used in experimental physics apparatus. equipment; Chapter III to Chapter V of the basic physics experiments. covering the mechanical. thermal. electromagnetic. optical total of 26 experiments; Chapter VI of modern physics experiments and a comprehensive test. a total of six experiments ; Chapter VII of the design experiment. a total of eight experiments; Chapter VIII of the simulation. a total of 20 experiments. End of the book with a commonly used physical constants and the International System of Units Introduction. These experiments. both over a long period of teaching practice. experiment more mature content. but also the physical technology and computer technology combined with the new experiment. Both are independent of each experiment. and gradual manner. with each other to form a complete system. enabling students in the experimental methods. experimental techniques and experimental apparatus have been used in a comprehensive and systematic training. This book can serve as the professional engineering institutions of higher learning university physics experiment teaching materials. but also as correspondence. TV. vocational university and other materials. but also for teachers and laboratory technicians test reference. Contents: Introduction Chapter measurement error. uncertainty and data processing one measurement and error two. and reduce the...
